- Character - Above all else, we believe in being an ethical, dependable company that focuses on quality.

BTC Construction Operations Preconstruction Services

Btc construction pre construction services aims at helping the client to meet the vision as well matching the budget. These services will make sure the projects is feasible on a given site and enables the client to look into some more cost effective options. Within our Preconstruction services, we act as a value-added member of the design team, enhancing the design segment of the job by providing accurate pricing information and marrying the budget to the actual design. By incorporating items such as sustal-

the client to meet the vision as well matching the budget. These services will make sure the projects is feasible on a given site and enables the client to look into some more cost effective options. Within our Preconstruction services, we act as a value-added member of the design team, enhancing the design segment of the job by providing accurate pricing information and marrying the budget to the actual design. By incorporating items such as sustainability and maintenance costs into our design review, our suggestions can often save the owner money well into the future. Our pre-construction team works to reduce the overall project cost by saving time, labor and expenses. The result is a building designed to the owner's specifications, within budget and with no surprises.

General Contractor

This is whereby we will be responsible for providing all the material, labour, equipment and services necessary for the construction of the project. We might hire specialised subcontractors to perform all portions of the construction work. When we subcontract we are responsible for the quality of work performed by any and all of the hires. The main priority is also safety of the workers on the site. As BTC Construction, our services begin with pricing. We bid out the job in predetermined packages, and verify the validity of the bids using our extensive cost histories. During actual construction, we manage the day to day activity on the job, including safety, quality control and adherence to the schedule. We also provide bonding for the project and hold all subcontractor contracts, unless instructed to do otherwise by the owner. We have the ability to self-perform many aspects of our work, giving us greater control over the schedule and allowing us to truly drive the project.

Strategic Partner

As a Strategic Construction Partner, we operate as an extension of our client's own staff, overseeing both project construction and facilities management. Within this role, we create a "construction program" in which we manage design review, budgets, quality control, safety, and security, as well as any other client requested items.
